Re: Support for the Consensus Plan for 800 MHz Realignment
Ex Parte, WT Docket No. 02-55

Dear Ms. Dortch:

On behalf of the Salem Professional Fire Fighters, I encourage you to support the Consensus Plan for 800 MHz realignment. As a fire fighter and someone who represents the career fire fighters of Salem, effective radio communications is essential to the safety of our members and the citizens we protect on a daily basis. As a user of the 800 MHz radio frequency, the fire fighters of Salem understand the issues surrounding 800 MHz and would urge you to move forward on the Consensus Plan to resolve this issue.

The Federal Communications Commission has before it a "Consensus Plan" that would address cellular/public safety radio interference problems and provide more of the spectrum that first responders urgently need for radio communications. We support the Consensus Plan along with a wide spectrum of Associations including the Oregon Fire Chief's Association, Western Fire Chief's Association, and our state association the Oregon State Fire Fighters Council.

As you may be aware of, fire fighting is one of the most dangerous occupations in the nation, and when a line of duty death occurs, a lack of effective radio communications almost always plays a role in the death of a fire fighter(s). If for this reason alone, we believe it is long overdue for the FCC to move forward on addressing the interference problem, and the Consensus Plan does just that – moves us forward.

While some groups may outright oppose the Consensus Plan and others would like to "study the matter further", the fact remains that there is still significant communication issues to tackle, and further delays will continue to put our fire fighters, other emergency responders, and the public at greater risk. No plan is the perfect plan, but the proposed Consensus Plan is a step in the right direction, and on behalf of the Salem Professional Fire Fighters, we believe taking steps

sooner rather than later is in the best interest of our members and the citizens of Salem.

We urge the FCC to resolve the issues facing the public safety community expeditiously and adopt the terms of the Consensus Plan.

Sincerely,

Ray Murray
President, Salem Professional Fire Fighters, Local 314, IAFF
